(Updated April 1, 2020)

To our patients, referral sources and South Shore Community,

During the past few weeks, South Shore Orthopedics (SSO) has been working hard to balance the orthopedic needs of our community with the health and safety of our staff and providers, while doing our best to help prevent the spread of the Covid-19 virus. As of this date, we wanted to share with you some of the adjustments we have made in an effort to keep you informed.

SSO continues to operate on a daily basis, Monday – Friday from 8am – 4pm. Our primary focus has been on caring for those patients in the office who are deemed urgent or emergent. To that end, we have been following CDC guidelines and have implemented temperature testing when entering the building, social distancing, staff with facemasks and other changes to our workflows and staffing models to ensure patients can be seen safely and in a timely fashion. We are also asking that patients who can attend an appointment independently to please do so as to limit the amount of foot traffic through our clinic.

SSO continues to provide the same full range of orthopedic care including on-site X-rays, casting, custom splinting and DME services. We continue to offer same day, next day and walk-in appointments for those who meet the appropriate criteria for orthopedic evaluation.

As an adjunct to our orthopedic offerings, we started Telemedicine last week through Doxy.me which allows our Board Certified Orthopedic Physician and mid-level practitioners (PAs and NPs) to deliver orthopedic care virtually for both existing and new patients. Patients are being screened for these services by our teams at SSO as we look to provide the most appropriate, comprehensive and safe level of care.

Please continue to visit our website at www.southshoreorthopedics.com or call 781-337-5555 with any questions you may have or to book an appointment.

We hope that you and your loved ones stay safe and healthy during these trying times.

Sincerely,

South Shore Orthopedics

CORONAVIRUS UPDATE: If you have experienced any of the following symptoms, PLEASE CALL THE OFFICE AT 781-337-5555. We are asking all patients to STAY HOME and RE-SCHEDULE YOUR APPOINTMENT if you or any family member has recently had a fever greater than 100.4, cough, runny nose, nausea and vomiting, upper respiratory symptoms or international or out of state travel.
